GOPAK

MULTI-FUNCTIONAL FURNITURE

First for folding furniture & much more

Why choose Gopak

Gopak is a British manufacturer of multi-functional furniture, incorporating 100% recyclable aluminium into the majority of our designs. Our furniture is light in weight, yet extremely strong and durable.

All Gopak furniture has been designed to fold or be supplied flat pack for efficient, effective and cost saving transportation to the end user.

Made to exacting standards

Our quality accreditations include:
BS EN1729 Part 1 for Dimensional Fit
BS EN1729 Part 2 for Strength and Stability
GS TUV for Strength and Durability

Our Guarantee

Lifetime guarantee on all folding tables
5 Year guarantee on Enviro tables and Ultralight staging

Ultralight Staging Systems

- Lightweight aluminium staging
- Clever concertina design
- GS approved construction
- Lightweight yet very strong
- Multi configurable

How it works

Place the stage deck on top of the riser, connecting each corner of the stage deck with the upright corner bolts on the riser.

4

Once the corner sections have been connected, tighten with the Allen Key through the small hole in each corner of the stage deck. Alternatively twist the stage riser tube.

Having joined your stage decks and risers together, connect each platform by tightening the locking cleats located on the leading edge of each stage deck.

5

If required, you can join two risers together for additional height and they will still fold down without having to be disconnected.

6

The stage decks and risers take up minimal space, making this system the ideal choice for those with limited storage.

7

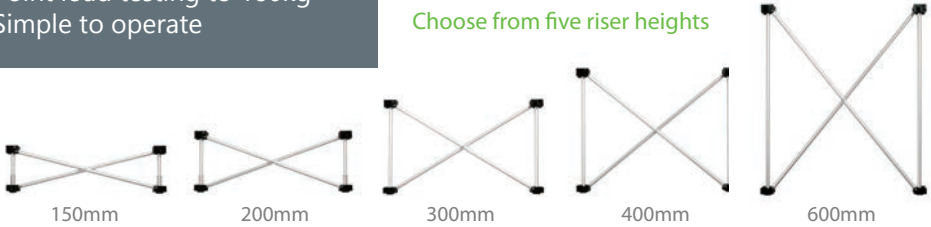

Ultralight Staging Components

Ultralight staging system

- GS approved construction
- Tested to 1000kg m² even load
- Point load testing to 180kg

Table 900mm diameter = 530mm
750mm long = 610mm

Internal width:

Table 750mm wide = 610mm
Table 600mm wide = 460mm

Why buy Gopak

- Multi-functional furniture
- Lightweight yet durable
- Quality hand finished products

What are the differences between the tables ranges?

There are two types of folding tables, a lightweight version and a heavier duty product.

Lightweight folding tables from the Contour25, Contour25 Plus, Premier and Economy ranges have an aluminium frame and a high pressure laminate top. Contour25 Plus folding tables feature a leg constructed from aluminium clad steel for improved stability and the Premier Range features the same aluminium clad steel leg and a seamless grey polyurethane edge. The heavier duty Universal, Vantage and Round folding tables have a high pressure laminate top and an aluminium frame with zinc plated elliptical steel legs. These provide exceptional stability. The Vantage Table has a seamless grey polyurethane edge.

The Enviro tables are supplied flat-pack for the user to assemble. The frame and legs are lightweight anodised aluminium and the top is constructed with a honeycomb core. The combination of these features gives a product far lighter than standard fixed leg tables manufactured with steel frames and MDF tops. The legs are fitted to the table frame using the dual Allen Key fixings on each leg which should be tightened fully following the instructions supplied.

How much weight will the products stand?

The tables will withstand a significant amount of weight. For example the lightweight Premier folding table (1830mm x 760mm) withstood a static vertical load of 460kg satisfying BS 5873(1985):Part 3 to test level normal. The Universal, Vantage and Round folding tables have passed BS5873 Part 3 test level normal and are GS Approved products.

How much do the tables weigh?

Folding tables weigh as little as 6.50kg for the smallest table up to 24.25kg for the largest heavy duty Vantage folding table. Enviro tables weigh between 10kg up to 25kg.

How do the products fold?

Lightweight tables – lift the leg cross bar out of the retainer mouldings, initially using both hands and lower the leg down.

Heavy Duty tables – squeeze the bolt mouldings in the Posi-lock together, this will release the bolts from the table chassis and allow the legs to be lowered into position.

This routine can be completed by one or two people depending on the stature of the operator involved.

What are the table tops made from?

High Pressure Laminate bonded to a Hardboard substrate which should be treated in a similar manner to a kitchen work surface.

How should the table tops be cleaned?

Using a non-abrasive household cleaner

How long will the tables last?

All Gopak folding tables come with a Life Time guarantee and all other items manufactured by Gopak are guaranteed for a five year period. You will find that if you treat our products with respect they will last considerably longer. In the UK there are many Gopak products still in use after twenty years and over.
